As people have lost humanity in the unprecedented high speed era, communities have been split and ruined by the past 100-year industrialization. To date, most advanced countries in the world have concentrated on policies to promote economic growth, and it sacrificed the 3S, **soul, soil, and society** for high-speed growth. Now it is time to focus on the new levels of 3S, **slow, small, and sustainable** as core values in our society for ancient future. **Cittaslow Jeonju**, a town of slowness and happiness invites you to the forum to seek out suggestions and insights for the town to pave the way for an information supplier of slowness. All we hope you show lots of attention and support for it.

November 2017, 4950  
*R.S.V.P* Ms. Youngsil Oh  
+82-2-2052-1754
