Country: Korea
Person in Charge: Park Il-young.....
E-Mail: youngten@korea.kr.....

Name of Local Government: Shinan-gun(County)
Contact: 0552-61-240-8355.....

Project Name

New and renewable energy development profit sharing system

Please check the subject that best describes the project in the following. (Must correspond with the subject)

Energy and environment policy

Description of Project's Key Point Summary

To promote new and renewable energy to establish a low-carbon, eco-friendly energy system
 However, it is difficult to implement it easily because a large amount of land is required to promote new and renewable energy policies, and there are civil complaints due to Pollution and Discomfort

- Noise problems in wind power plants, electromagnetic wave problems in solar power plants, and residents' sacrifices

For the settlement of the new and renewable energy business, we want to create an environment where we can lead directly together with the residents.

- Shinan-gun enacted an ordinance 'New and Renewable Energy Development Profit Sharing, etc'.

Share the profits from the new and renewable energy business with residents

Contributing to the activation of residents-led policies through the development of new and renewable energy with residents

Contribute to income increase by supporting 'Sunshine Pension' and 'Wind Pension' to residents as a gift of nature

Purpose of Project

New and renewable energy created together with residents

Smooth Promotion of Renewable Energy Policy

Residents' Income Increase

In return for the sacrifices of the people

Influx of local residents with income guarantee

Description of Project Outcome

Established 270MW solar power production facilities in 4 regions

A total of \$4 million was paid to 6,400 people over 22 months

- Approximately \$1,000 paid per person

A net increase occurred in a state where only a decrease due to deaths continued to occur

- An increase of 4,268 from 4,183 in Jido-eup
- An increase of 3,172 from 2,974 in Anjwa-myeon

Cost to Outcome

The cost of establishing a cooperative that is made with residents is only \$10

Staff Participation

One department(called the Department of Renewable Energy)

Additional Information (if any, please add)

Shinan-gun is currently working as a key player in the new and renewable energy business by proceeding with a large-scale offshore wind power plant targeting the wide open sea.
